

Weekly Research

Cross-asset weekly snapshot for market breadth, macro tone and long / short strength.

This document presents the research output of the 1XW framework, combining technical breadth and fundamental tone across the covered investment universe. Technical signals are derived from identified market setups, price-level confluence, trend structure and exhaustion conditions, while the weekly fundamental layer incorporates macro news flow and event risk. Final rankings combine technical strength with fundamental alignment, but should be read as research outputs rather than standalone execution signals. Top-ranked instruments highlight the highest-quality technical setups identified in the current regime, but do not necessarily represent immediate trade entries.

The investment universe covers a liquid cross-asset set of global markets, implemented through futures and options on futures, and designed to capture broad macro dynamics through a consistent technical framework applied across all instruments on a weekly basis:
